

TECHNICAL BULLETIN

For Best Results using CIRKIL[®] CX During **Cold** Weather

- Store CIRKIL[®] CX in a dark and dry area. Storing the product at temperatures below 60 °F can lead to solidification.
- If the product becomes solid or slushy, warm the bottle to 70-85 °F to melt solids without any loss of activity.
- Slushy CIRKIL[®] CX may also be mixed with warm or “tepid” water (60-85°F) per label instructions without any loss of activity.

Mixing slushy CIRKIL[®] CX in water colder than 60°F can lead to separation of product or clumping which cannot be reversed and the product cannot be used.

Always read and follow label directions when using CIRKIL CX.

For more information on the CIRKIL[®] Product Line, visit www.terramera.com or call 1-800-597-9509.
